

BE READY TO ACCEPT **APPLE PAY.**

As more and more customers are going wallet-free, you will need to have the latest payment technology available. Through North American Bancard you can receive FREE Apple Pay-ready equipment.

NORTH AMERICAN BANCARD IS EXCITED TO OFFER NFC/EMV ENABLED
EQUIPMENT OPTIONS
THAT ALLOW YOU TO ACCEPT CONTACTLESS PAYMENTS.

1. Vx520 DC NFC/EMV

IDEAL FOR

New merchants that do not have existing NFC-enabled equipment.

2. PIN Pad Vx805 NFC/EMV

Works with Vx510 DC • Vx520 DC NFC/EMV • Vx520 EMV • Vx570 EMV

IDEAL FOR

Merchants that have terminals but are not NFC-enabled. The Vx805 is an add-on that can connect to any of the terminals listed above.

So what is Apple Pay and how does it work?

Apple Pay uses a Near Field Communication (NFC) antenna in its mobile devices to bring contactless payment technology to the masses. Here's how it works:

- Customers register their credit card(s) through Passbook.
- At the time of payment, customer holds their iPhone 6, iPhone 6 Plus, or Apple Watch to your NFC-compatible terminal
- The two devices communicate with each other to handle payment

What is NFC?

NFC allows a mobile device to exchange data with another enabled device. Specific to mobile payments, customers will typically use their smartphone to communicate with the NFC-compatible terminals in order to make a payment. Large retailers already have NFC-compatible equipment in place, but this technology has yet to be widely adopted.

MAKE SURE YOU
ARE ONE OF THE
FIRST
SMALL BUSINESS
OWNERS
TO START ACCEPTING
CONTACTLESS
PAYMENTS
